Interreg Baltic Sea Region

Co-funded by the European Union

ENERGY TRANSITION Energy Circle

PERIOD: March 2025 - February 2028

PROJECT BUDGET: 2.99 Million EUR.

TARGET GROUPS: Business support organisation / Local public authority

ERDF co-financing: 2.39 Million EUR.

Energy Circle

EnergyCircle addresses the BSR's energy vulnerability exposed in 2022 by promoting a shift from short-term interventions to long-term, circular energy planning. The project offers two main tools: a Builder Competence Analysis and an EnergyCircle Roadmap, helping actors design and implement sustainable energy independence strategies.

CONSORTIUM

- 5 Business Support Organisations
- 5 Local Governments
- 5 Research Institutions

PROJECT GOALS

To promote circular energy independence in industries and communities by combining renewable energy, storage, and efficiency solutions for self-sufficiency.

CORE MESSAGE:

EnergyCircle promotes circular energy independence through strategic planning, hands-on toolkits, and real-world testing—bringing energy self-sufficiency closer to reality.

DEVELOPED SOLUTIONS:

- Strategy for circular energy independence
- Toolkit for practical use in businesses and communities
